Subject: Docket No. 07-BTSD-1.

I cannot believe you will take another freedom away from us! Why don't you guys worry about serious issues - like adding more nuclear power plants, just like the "nice Iranian" people are trying to build!!!! We have enough regulation don't you think! Or maybe our state officials are so enamored with our "buddies" in China that they want to be just like them! Next thing you'll tell me is that they want to put a sensor in my car to see if I'm wasting AC in there too!!

This is ridiculous and with members of my family that are very sensitive to temperature conditions because of their health - I guess no one cares about them.

Just take out the regulations and let the "Adults" take care of our power situation. In other words stop getting in the way of the power companies!!!!!!!!!!

*****Start the year off right. Easy ways to stay in shape.
