To Whom it may concern

This proposal is outrageous, You want to control the power used by people in their own homes? That is far too much like socialism to be used in our country.

Just to let you know, we do conserve, heater off at night, all bulbs have been changed over to the new efficient ones, lights off as we leave the room, I am on oxygen 24/7 we try to compensate for that usage.

Please re-think this, it is an intrusion of the worse kind.

Thanks

Harriet Clayton
