Subject:

govt. controlled thermostats

DOCKET
OT-BSTD-1
DATE JAN 1 5 2008

I will campaign actively against any politician who endorses or votes for a plan to put govt. or industry controlled thermostats or electronic devices into people's homes. This is a move to Increase govt control over people's rights to freedom and self determination, and that a person's home is his or her castle. James Roush
