Subject: Docket No. 07-BTSD-I

This idea to remotely regulate people's power usage is deeply troubling to me. If you politicians would quit wasting time and resources on your own careers and pet projects then maybe we could realize a responsible solution to the power shortage (like increase supply!). Try building a new nuclear plant instead of forcing yourself into my home and family life. I am sick of dictatorial ideas like this one and I promise - I WILL NOT ABIDE BY IT. I will vote against anyone who favors this stupid idea. Take your communist beliefs and move to Cuba instead of trying to force me into it!

With very strong opposition,
