What the hell is it with California bureaucrats? Just can't get enough control over us peasants, is that it? I've about had it with the "nanny state" and you ninny's who want to run (and ruin) our lives. Keep your mitts and controls off my thermostat, and whatever else is in my house. You don't pay my bills, I do. If there are energy shortages, build some more power plants and add some nuclear energy too. Instead of butting into every room in my house, butt out! Democrats are always complaining about Republicans monitoring their bedrooms; now the Dems want to monitor the rest of our home. No more Big Brother. Some of us have had more than enough. Justa Citizen D. Skrady

Start the year off right. Easy ways to stay in shape.
