The very idea that someone other than my wife or I controlling my thermostat, lets say my kids, or the local monopoly that supplies the means of power and gas to my home is obscene. Have you folks ever considered increasing the supply? When you want a drink of water, why not take a smaller glass? It's the same rational, save a little for someone else. It sounds so compassionate. It's fools without any reason who have no idea how to solve a problem. Get busy and do the right thing. Increase supply, and do it nuclear so it's clean.
