Hello Mr. Gekas,

After reviewing this proposal I do not think allowing Big Brother into my home to control the heating and air. This is not the way at get people to become more responsible. People must be responsible on their own I'm sure my family is not the only one that disapproves of this. My family follows the rules when the call goes out to lower consumption even the spare the air days. So please do not allow this to continue forward.

Thanks,
Marcus Dixon
