Subject: Smart Thermostats

DOCKET	
07-BSTD-1	
DATE	JAN 12 2008
RECD	JAN 15 2008

To Whom it may concern:

Please do not allow utilities to control how we think or control our thermostats. Frankly, I work for a major California utility and would by no means want them to have access to any controls in my own home. I try to conserve as much as possible by recycling and keeping an eye on the thermostat. I am considering getting a solar heating and hot water system for our roof too. So please allow each individual to control how they use the thermostat instead of Big Brother.

Sincerely yours,

Matthew Clowry
