Subject: Fwd: Smart Thermostats - No Way!!!

Keep you noses out of our homes and keep your cotton pickin' fingers off of our thermostats!

I can tolerate your legislating safety issues like helmets for motorcycles, seatbelts in our cars and cell phone usage while driving but stepping into our homes to regulate our comfort is going too far! Some people are more warm blooded than others and some can tolerate the heat more. Remotely altering the heating or cooling in our homes steps too far into controlling our lives. This is too Orwellian.

I will be watching our state senators and representatives to see who votes for this. I will not support them in their future election efforts.
