Subject: Programmable Communicating Thermostat

I am emailing you to express my strong opposition to the programmable communicating thermostat (PCT). I find this idea to be an incredible invasion of my privacy. It is one step closer to the government trying to control my private life. My Wife and I do not use our heater or air conditioner a lot, but that should be up to us. Not some bureaucrat who thinks they know us better or know what is best for us. I'm sure there are other ways to try to "green up" California. This definitely is not one of them. Thank you for your time.

John Welker
Napa, CA
