Subject: Fwd: 2008 Energy Efficiency Building Standards

>>> "Ted Langan" <trketed@gmail.com> 1/15/2008 3:13 PM >>>

I oppose the California Energy Commission's proposed regulation to allow utility companies to remotely control our thermostats. It's an issue I feel strongly about. This proposal is big brother government at its worst, and I do not support it anymore than I would support allowing the government to put cameras in our homes. It is an invasion of our privacy and individual rights.

I also oppose any revisions to the original proposal as it would merely be a stepping stone down the path to the original proposal.

You're a bunch of Nazis and all of you deserve to hang for treason!

Sincerely,

Richard T. Langan
