

Docket Optical System - Docket No. 07-BTSD-1

From: "Bryan Bosch" <bryan.bosch@thumpertalk.com>
To: <Docket@energy.state.ca.us>
Date: 1/16/2008 9:51 AM
Subject: Docket No. 07-BTSD-1

Stop. Enough governmental interference in our lives! We don't need you to be our nanny! You've seem to have lost the concept that we have brains and that we are capable of programming our thermostats to turn on/off based upon weather conditions and the various temperatures that it brings. You also seem to forget our ability to understand the concept of responsible use of power resources, so many of us are already conserving on our own.

You'll never monitor my house and if it comes down to losing my power, I'll pick up my family, business and leave this state. This is too far, you know it and you need to stop!

Bryan Bosch
San Diego, CA (for now)
