First; seat belts in your car, then smoking in your own car, now State control of your own house temperature. What's next
---- cameras in your bedroom? Whoever thought of this idea. should be immediately impeached, fired and/or put away
in a locked room with no connection to the outside world before they can do serious 'Big Brother' harm to our state. This
idea is sheer lunacy. Is Claudia Chandler the culprit or is she just the mouthpiece for the idiot who is in charge of this idea,
and if so who is in charge?
