To Whom It May Concern :

What an outrage!! What next, government spy cameras in our homes?

This proposal of the energy companies controlling private buildings' energy uses is outright UNCONSTITUTIONAL PERIOD. I liken this business to the "camel's nose under the tent." As always such proposals lead to others that eventually erode our already meagre personal freedoms as they are now.

So, I lodge my vehement protest against "smart thermostats"!!!!!!

Taxpayer and Energy User in No. CA
