To whom it may concern,

This new, Big Brother approach to energy conservation will drive more tax payers (including myself) from our state.

I was born here. My son is buried in the soil here. It will be hard to leave. But if this type of thing continues to grow in this state, I will leave and take my taxable income with me. My income is based on out of state investments. I can live anywhere.

Focus on educating people on how to conserve. Keep government controls out of it.
