Subject: Governmental thermostat control

To whom it concerns,

I am writing to express my extreme opposition to having any external limits or controls set over my individual house thermostat. Despite that I practice energy conservation, recycling and other activities for the welfare of our planet, and proposit this to others at any and all opportunities, I do not want any Government control applied to this. There are many conceivable circumstances that one might temporarily need to go above their usual energy use; perhaps other deterrents such as price, etc could be applied.

Thank you for your attention to my concerns. I look forward to hearing more about this, and will follow along closely.
