Jackalyne Pfannenstiel

Dear Jackalyne Pfannenstiel:

Please stop the government intrusion into our own homes by requiring homeowners to install a thermostat that can be adjusted by government

I oppose the government controlled thermostats in our own homes.

I already do my part in recycling everything I can. Boxes, Newspapers, Cans, Plastic juice bottles, water bottles, grocery bags, used ketchup bottles, pickle jars, aluminum foil, sandwich bags and so many more. I take out my blue-recycle can more than my regular black-garbage can. I don't see the rest of my block participating... how about building more awareness in recycling!

Include wal-mart to print a list of missed recycled items on the side of their bags. or Target to hold monthly recycling clinics on teaching what is trash and what is re-useable.

I think that if need to save energy, we should not restrict it, we should re-use it.

I oppose government controlled thermostats and recommend an easy and better alternative.

Sincerely,

Joseph Salazar
