Subject: Comment About PCTs, Docket # 08-DR-1

Hello,

I am writing to comment on the proposal to include PCT's in new buildings in the state of California. While I fully support efforts to reduce energy usage, develop ecological friendly energy practices, and include higher efficiency standards I cannot support a proposal that undermines a private citizen's control over their privately owned property, personal environment, and personal security. In my mind, this is a slippery slope that threatens the integrity of a free democracy and I do not believe that it is overstating the issue to suggest that such technology would only add to the many other technologies that currently infringe upon our personal liberties.

Thank you for your time.

Sincerely,
Robin Dunkin
