**Subject:** smart thermostats

To Members of the California Energy Commission,

Shame on the commission and on spokeswoman Claudia Chandler and member Arthur Rosenfeld for even considering this invasion of the Privacy of American citizens. Ask us to further limit our energy use and we will, but do not give this power to a private company whose primary concern is its own profit, not the welfare of Californians. We are shocked. This is a make or break political issue.

Professor H, Neal Bertram and Mrs. Ann L. Bertram
