Return: Christopher Myers

from: Theresa Acerra (6 pages, including mispages)

I forgot to give you these 1/17/08. These are 40 business owners and employees adjacent to peaker. They join with us in insisting it be sited further away from them, residents and schools. One business complained when existing peaker operates their windows rattle. Others are concerned about heightened risk of being so close, air pollution, noise and visual blight negatively affecting their businesses. They want this to be docketed as part of public record along with 260 residents' opinion turned in in November. I will send DVD of 1/17/08 meeting with separate videos of public comments (included). We want this docketed as well.
