

THIRD ERRATA to PRESIDING MEMBER'S PROPOSED DECISION

WALNUT CREEK ENERGY PARK
APPLICATION FOR CERTIFICATION
DOCKET NO. 05-AFC-2

Background

At the Committee hearing on February 21, 2008, the SCAQMD stated that its public comment period on the Addendum to the Final determination of Compliance had ended and that comments had been received from the Applicant and the federal Environmental Protection Agency (USEPA). By letter dated February 22, 2008, the SCAQMD identified five comments from the USEPA which were going to lead to minor revisions of the Addendum. The Committee has examined the proposed changes to the SCAQMD's Addendum and determined that they do not materially alter the Conditions of Certification proposed for the Commission Decision. Notwithstanding, this Third Errata enumerates the changes which are proposed to be incorporated in the Commission Decision.

Air Quality

Based upon SCAQMD's comments, dated February 22, 2008, the following changes and additions are made to the Air Quality section:

- Condition of Certification **AQ-7** is amended:
 - For PM10, required averaging time is changed from "District Approved Method" to "Method 5," and "District Approved Averaging Time" is changed to "4 hours."
 - For SOx, "Approved District Method" is changed to "AQMD Method 307-91."
 - For VOC, "District Approved Method" is changed to "AQMD Method 25.3" (USEPA Comment No. 5)

- Condition of Certification **AQ-13** is supplemented with the language, "Under any operating condition, including start-up, the maximum operating temperature shall not exceed 750°F." (USEPA Comment No. 2)

- Condition of Certification **AQ-14** is supplemented with the language, "Under any operating condition, including start-up, the maximum operating pressure shall not exceed 7.6 inches of water." (USEPA Comment No. 2)

- Condition of Certification **AQ-18** is amended:
 - "For the purposes of this condition, ~~operating time~~ one year shall be defined as a period of twelve (12) consecutive months determined on a rolling basis with a new twelve month period beginning on the first day of each calendar month." (USEPA Comment No. 3)

RECD.	FEB 26 2008

///
///

In response to USEPA Comment No. 1, the SCAQMD proposes to amend its conditions by changing any reference to Rule 1703 to state "Rule 1703(a)(2) PSD-BACT." The Committee has examined the Commission's Air Quality Conditions of Certification and does not find any reference to SCAQMD Rule 1703. Thus, no change to Commission Conditions is warranted.

In response the USEPA Comment No. 4, the SCAQMD proposes to add language requiring at least monthly monitoring and recordkeeping for the elapsed time meter readings, which record the hours of project operation. The Verification of the Commission's Condition **AQ-18** requires reporting to the Commission quarterly. The Committee has determined that even if the Applicant is required to perform monthly monitoring and recordkeeping for the SCAQMD quarterly verification to the Commission is sufficient. Thus, no change to the Commission Condition is warranted.

Dated: February 26, 2008

**ENERGY RESOURCES CONSERVATION AND
DEVELOPMENT COMMISSION**

JACKALYNE PFANNENSTIEL
Chairman and Presiding Member
Walnut Creek AFC Committee
