RE: CVEUP

Dear Mr. Myers:

The Energy Commission needs to reject the Chula Vista Peaker Plant Upgrade project because it is too close to residents, schools, and non-industrial businesses. The CV General Plan requires a 1,000 foot buffer for power plants. This is minimal and would be violated by this project.

Sincerely,

*Theresa Acerro* 163 TEENA DR CV. 9194

RE: CVEUP

Estimado Sr. Myers:

La Comisión de Energía necesita rechazar el proyecto de Aumento de la central eléctrica de peaker en Chula Vista porque está demasiado cerca de residentes, de escuelas, y de los negocios no-industriales. El Plan General de Chula Vista requiere un búfer de 1,000-pie para centrales eléctricas. Esto es mínimo y sería violado por este proyecto.

Our community is impacted by numerous sources of air pollution. Even a tiny bit more is unacceptable. This plant would increase particulate matter, SOx and VOC. This is NOT acceptable. No mitigation will help us. The County is giving them credit for pally-ball an unproven, controversial technology. This is NOT acceptable. 9 people at Montgomery High have contracted cancer - several more than once. Two have died. Two 70 foot smoke stacks will

When the plant was built the impact was to be minimal. Since then a regional park has been built. Several commercial complexes have been built, added traffic and pollution is affecting the air quality.

To Allow an out of state company to enlarge this property with smoke stacks and increased pollution to our residents is reprehensible.

Please consider our health and welfare in the future, that's more important than the profit of a company!

Sincerely, Sharon Ward
