RE: CVEUP

Dear Mr. Myers:

The Energy Commission needs to reject the Chula Vista Peaker Plant Upgrade project because it is too close to residents, schools, and non-industrial businesses. The CV General Plan requires a 1,000-foot buffer for power plants. This is minimal and would be violated by this project.

*Not here*

RE: CVEUP

Estimado Sr. Myers:

La Comisión de Energía necesita rechazar el proyecto de Aumento de la central eléctrica de peaker en Chula Vista porque está demasiado cerca de residentes, de escuelas, y de los negocios no-industriales. El Plan General de Chula Vista requiere un búfer de 1,000-pie para centrales eléctricas. Esto es mínimo y sería violado por este proyecto.

No estamos de acuerdo en esa planta.  
Por que va a ser danino para la salud.  
deberian escoger un lugar mas retirado  
que no este poblado

Not only is this considered a violation but it is completely wrong under ethical and humane terms. Money is not the object here but the people that are going to have to live surrounded by the plant and the emissions of transits. This is environmental racism and completely wrong. It is the wrong place to put the plant and other methods for alternative energy that do not include health hazards for the community can be devised.

The plant where it is being placed is dangerous and where it's being located is poorly decided. Why couldn't the plant be placed in the "New" Chula Vista. Otay Ranch, Eastlake, instead of building it in the poorer area. It's ~~going to~~ hurt children.

Sincerely,

I feel that Chula Vista is a huge place, I don't know if you have been denied anywhere else, but building a plant around kids from kindergarten up is not safe, you should consider looking for a new place. My kids are more precious than the need for more electricity. It is not going to happen.

This is a terribly bad idea not just environmentally but economically.

In a time of increasingly scarce oil thus soaring <sup>fossil-fuel (including natural gas)</sup> prices that will translate into soaring monthly electric bills, committing to a ~~oil~~ <sup>fossil-fuel</sup>-based power plant for 30 years is extremely unsound financially.

Tear up this plan and put solar panels on every roof in Chula Vista AND DEVELOP conservation strategy and educate all the public on same.

Sincerely,

As an educator in our community, I am appalled that this project is actually being considered! It was such a hush-hush process and I only found out one week ago. The negative impacts on the residents in close proximity to this plant and, especially, the children at our schools are unquestionably clear. Let's not look the other way and only see dollar signs (monetary benefits). We would be further sacrificing an economically disadvantaged group. Let's build it further east! They can afford the healthcare it will require!

— My name is Rosa and I live in Chula Vista, near the power plant. I have a family. The citizens and my family are opposed to power plant. I know that the power plant in another location will be less damaging to the health of others. I am concerned that this plant can cause more damage to the health of others. Some of family members that have died of cancer who lived close to the power plant. I feel that this is not a coincidence.

Thank you.

It may be known to people who build plants that it's best to expand on an area that has already been defiled by the pollution, but that doesn't make sense for the public. How is that OK for the people who live here? If you refuse to build away from the community and exacerbate the situation because you "might as well," When will it End? Will you keep building until everyone moves away or will people have to die before you open your eyes?

You may not care about these people because you're fine spending all of your money on fancy suits, but some of the citizens who live near the plants may be spending all of their money on medical bills or funeral arrangements. You'll be wearing red ties while they can only wear black. It may be difficult to impact the world on an international level, but this is a chance to help people who live near your community. Please think of what you're doing to these people.

The original "Peaker Plant" was put in without the needed precautions. It is too close to homes, businesses, and schools. The impact of an expanded plant would add too much pollution to an already impacted area.

The <sup>OURP</sup> park is trying to be a positive entity in this area. To put a power plant of this size would be an eyesore and negative project at this location.

RE: CVEUP

Dear Mr. Myers:

The Energy Commission needs to reject the Chula Vista Peaker Plant Upgrade project because it is too close to residents, schools, and non-industrial businesses. The CV General Plan requires a 1,000-foot buffer for power plants. This is minimal and would be violated by this project.

Commissioners,

We do not appreciate you putting up a power plant too close to homes and schools. **WE DON'T WANT THIS!** Listen to the people, as we disapprove of this pollution site. ~~we~~ ~~do not~~ ~~appreciate~~

What are you thinking?!? This, in the future, will be the cause of many sicknesses! All of you should NOT allow this power plant to

Sincerely,

RE: CVEUP

Estimado Sr. Myers:

La Comisión de Energía necesita rechazar el proyecto de Aumento de la central eléctrica de peaker en Chula Vista porque está demasiado cerca de residentes, de escuelas, y de los negocios no-industriales. El Plan General de Chula Vista requiere un búfer de 1,000-pie para centrales eléctricas. Esto es mínimo y sería violado por este proyecto.

LA RAZON POR LA CUAL. NO QUE REJNOS,  
ESTA PLANTA NO SE DEBE PONER.  
POR EL PROBLEMA PARA LA SALUD,

Sinceramente,

I can't believe that this project is even being considered! Being so close to these neighborhoods and in particular to our youths. I am strongly opposed to the expansion of the existing plant. There must be a better location for such a project. Tell the power mongers to find alternative energy resources and locations.

Sincerely,
