Subject: Closing 06-O11-1 and Opening 06-O11-1C

The Order Instituting Informational Proceeding for the *California Guidelines for Reducing Impacts to Birds and Bats from Wind Energy Development* was concluded at the Business Meeting on September 26, 2007. Accordingly, we request that Dockets close Docket 06-O11-1.

We would also like to request a new docket to house comments received on the final guidelines over the next 5 years or so. Please open a new comment docket, 06-O11-1C, to provide a repository for comment letters.

We ask that Dockets not automatically serve or distribute these comments to parties as they were during the active proceeding unless later requested by the project manager(s) or items are specifically requested by the public. Although not technically a compliance case, compliance staff has suggested we handle this new comment docket for the now-closed proceeding in the same manner as a typical siting case compliance docket.

If you have any questions or need more information, please contact me, Misa Ward, at mward@energy.state.ca.us or 651-9010.

Thank you.
