**NOTICE OF INSIGNIFICANT PROJECT CHANGE
TO LEAVE TEMPORARY IMPROVEMENTS IN PLACE FOR LAND OWNER
for the INLAND EMPIRE ENERGY CENTER PROJECT
(01-AFC-17C)**

On May 7, 2008, the California Energy Commission received a petition from Inland Empire Energy Center, LLC, to modify the Inland Empire Energy Center Project. The 800-megawatt project was certified on December 5, 2003, and will begin commercial operation in August, 2008. The facility is located in the City of Romoland in Riverside County.

DESCRIPTION OF PROPOSED MODIFICATIONS

Inland Empire Energy Center, LLC, is seeking approval to leave temporary improvements made on land that was leased from the land owner.

ENERGY COMMISSION STAFF REVIEW AND DETERMINATION

Pursuant to section 1769(a)(2), Title 20, California Code of Regulations, Energy Commission approval of the project modification is not required if Energy Commission staff determines that:

- There is no possibility that the modification may have a significant effect on the environment, and
- The modification will not result in a change to or deletion of a condition of certification, or make changes that would cause the project not to comply with applicable laws, ordinances, regulations, or standards (LORS).

Energy Commission staff has determined that the proposed modification meets these criteria because:

- The modification will not have any significant effect on the environment because the existing land is designated "Industrial" as per Specific Plan No. 260. This improved parking area will be consistent with the designation;
- Existing conditions of certification are sufficient to cover the proposed modification without changes to, or deletions of, any conditions of certification; and
- The project as modified will maintain full compliance with applicable LORS.

Any person may file a written objection to staff's determination within 14 days of the date of this notice on the grounds that the project modification does not meet the criteria set forth in Section 1769(a)(2). All objections must be in writing and must be sent either by U.S. mail, e-mail, or other document delivery service to Dale Rundquist, Compliance Project Manager, at the address shown below:

RE: Leased West Parking Lot

Attn: John Gates

Please consider this our formal request that you leave in place all improvements to the leased property on Antelope Road and Dawson Road, known as The Leased West Parking Lot and legally described as Lot 98 and Lot 127, of Trumble Farms, Riverside County. Naturally, anything that would be considered "hazardous material" should be removed and legally disposed of prior to the termination of the lease.

We believe that it is in the best interest of all parties to leave these improvements in place, especially the paving material, to eliminate the expense of removal and the air pollution from dust during the removal process. Also, leaving the paving in place will minimize wind and water erosion and weed control in the future.

Thank you in advance for your help and cooperation in this matter. If you have any questions or concerns, please do not hesitate to contact myself or Mike Grabowski.

Sincerely,

Timothy L. Anderson.
Michael J. Grabowski
