Dear Commission Members:After considerable review of the proposed location for a peaker plant in Chula Vista I am surprised that a site has been chosen located in such close proximity to residential properties and schools, when other more suitable sites are available in the more remote regions of eastern Chula Vista. I am certain that this is the continuing environmental injustice perpetrated by City staff and elected officials on the residents of the South Western region of Chula Vista. If the affected residents were more affluent the peaker plant would not be approved for this location. You have the opportunity to preserve the health, welfare and quiet enjoyment of the residents located near the proposed plant and I urge you to do so.Ned Ardagna (619) 498-0300
