<b>NAME:</b>	James Weigand	<b>DATE:</b>	12/01/ 08
<b>TIME:</b>	4 PM		
<b>WITH:</b>	Carlsbad Fire Department		
<b>SUBJECT:</b>	Response Times to Carlsbad Energy Center		

I, Marie McLean, called Carlsbad Fire Marshall James Weigand to resolve discrepancies in response times to the Carlsbad Energy Center.

Mr. Weigland provided the following information:

1. The fire department would have a difficult time responding in to a major crisis at the Carlsbad Energy Center within an acceptable time because of the plant's location. He specifically said that (1) he would need to get four trucks to the site; (2) there is only one entrance to the plant; (3) the plant is on the other side of town from the Fire Department; and (4) there are obstacles to getting to the plant--overpasses and so forth.
2. A response time is hard to predict. If he had to give a response time, it would be 15 minutes.
3. The fire department could respond to a medical emergency at the plant because only one vehicle needs to respond and it is a specially equipped vehicle, not a fire truck.
