Re: Coleman Meadow Spoils Project

Dear Mr. Dale Rundquist,

This letter is a notification that Bottle Rock Power LLC (BRP) completed the removal of the non-hazardous spoils from Coleman Meadow located on the VV&J Coleman Lease on October 8, 2008. Hydro seeding of the area was necessary for erosion control; sterile seeds were chosen so that the naturally occurring grass types could reseed the area the following spring. The area of disturbed soil was hydro seeded with sterile seed on October 20, 2008.

Continued monitoring for erosion and the restoration seeding will be done throughout this winter and following spring 2009. A consultant has also been contacted to aid in sampling of the meadow and surrounding area as an on going program.

Please contact me with any questions or concerns at 707-928-4578

Respectfully,

A handwritten signature in black ink that reads "Karon Thomas".

Karon Thomas
Compliance Manager
