Russ Nichols
Power Plant Manager
5120 Phillip Road
Roseville, CA 95747

Dear Mr. Nichols,

I received your letter and I want to thank you for your help in regards to investigating and implementing changes to reduce the power plant noise level. The noise has been reduced with the exception of when the turbines start up and shut down. Also, there has been no improvement in the noise level from the air valves.

I have complained to the California Energy Commission and I voiced my opinion regarding the need for a lower noise standard and, if necessary, a sound barrier around the plant.

I will continue to monitor the noise but, at this time, I am not sure of what my options are in regards to getting the city to further reduce the noise.

Thanks again for your help.

Sincerely,

Wm. Harris
