RE: LADWP's Request for Extension to Submit 2009 IEPR Electricity Data

Dear Mr. Alvarez,

This letter responds to your February 10, 2009, written request to extend the filing deadline for certain IEPR electricity data. Your request includes all required data on historical and forecast data on electricity demand, retail prices, and resource plans. According to forms and instructions adopted by the Energy Commission on December 17, 2008, this information is to be submitted by February 13, 2009, for our assessment work as part of the 2009 *Integrated Energy Policy Report*. The Los Angeles Department of Water and Power (LADWP) is requesting an extension of this filing deadline to March 2, 2009.

Based on the information provided in your letter and declaration, I find that good cause exists for an extension and that the required data and narrative information is likely to be submitted by the extended due date of March 2, 2009.

We look forward to LADWP's fully integrated responses to our data requests, including all required reviews and approvals. Integrating energy efficiency projections and renewable energy procurement goals with the demand forecast, revenue requirement forecast, and supply resource plans are essential. Data describing how LADWP's resource portfolio may change through 2018 to reduce greenhouse gas emissions will be of statewide importance in addressing climate change.

Sincerely,

A handwritten signature in black ink, appearing to read "Melissa Jones", written in a cursive style.

MELISSA JONES  
Executive Director
