 Dear Commissioner Boyd,

It is with great concern for our local community here in Chula Vista that I write you this letter. As you well know the company MMCE has a peaker site here in Chula Vista. The site is within a "Stones Through" from where I work. Our building is at 3517 Main street suite 301 Chula Vista CA 91911. When the peaker site fires up we can hear the noise permeate our building and some of my employees have reported migraine headaches from the prolonged exposure to this noise. We also have found an oily sludge like pollutant that comes from the peaker exhaust that dries up on our cars finishes. While I having been working at this location for the past 14 months. I have been able to observe first hand the danger and damage this peaker site brings to the Chula Vista community.

I would like to "thank you" for voting down the expansion of this "destructive element". I think that there are better locations for this site that will not put people of property in harms way.

Sincerely,

Eric Meyers
Operations Manager
