RE: Application for Confidential Designation – Constellation NewEnergy, Inc.  
IEPR Electricity Demand Forecast Submission, Docket No. 09-IEP-1C.

Dear Ms. Jones:

Constellation NewEnergy, Inc., (“CNE”) by this Application for Confidential Designation to protect certain information provided to the Commission in the attached Resource Plan submission consistent with Title 20 California Code of Regulations (“CCR”) Sections 2501 *et seq.*

Please feel free to contact me at (916) 447-2166 should you or Staff have any questions or require additional information regarding this Application. Thank you for your consideration of our request.

Sincerely,

Andrew B. Brown  
Chase B. Kappel

Confidential Materials in Sealed Enclosure.

**APPLICATION FOR CONFIDENTIAL DESIGNATION**

**Constellation NewEnergy, Inc.**

**Electricity Demand Forecasts**

**February 13, 2009**

**Docket No. 09-IEP-1C**

1. *Specifically indicate those parts of the record which should be kept confidential.*

CNE requests that the following information remain confidential:

Form	Information to be held confidential
FORM 7	Data, disaggregated by utility distribution area, for annual metered sales, annual peak demand and customer counts, for years 2006-2011.*
FORM 8.1a (ESP)	Data, disaggregated, for estimated power-supply costs for bilateral contracts and residual market transaction, and the sum of both these costs for years 2006-2011.*
<small>* CNE was previously granted its request for a three year confidentiality period. (See Attachment A, Letter from CEC Executive Director granting confidentiality.) As such, 2006 information continues to be confidential through December 31, 2009., For 2007 through 2011 data, CNE seeks confidential treatment December 31, 2012.</small>	

To further assist in the identification of information for which CNE requests confidential treatment, CNE has shaded all cells containing this data yellow.

2. *State the length of time the record should be kept confidential, and provide justification for the length of time.*

Because (1) the information is not otherwise publicly available or readily discoverable in the form or detail provided, (2) the information is market sensitive and constitutes trade secrets in terms of supply portfolio development and risk management, and (3) the release of this information will result in loss of competitive advantage in the wholesale and retail marketplaces relative to CNE's ability to negotiate future contracts for the purchase or resale of energy and/or capacity at wholesale, or negotiation of contracts with retail customers, CNE asks that the identified data be held in confidence for a period of at least three (3) years from the time of production to the Commission. Specifically, and to simplify administration, CNE requests that the 2007 through 2011 data be protected through December 31, 2012. This requested period of time is appropriate as the detailed data is expected to retain validity and market value over that period insofar as it can be used with other data to discern CNE's market strategies, including risk management efforts or expectations of future market activities, and because any lesser period would undermine existing protection of the same or substantially similar data by other entities, including the California

Public Utilities Commission (“CPUC”) and the California Independent System Operator (“CAISO”). This period of time is also consistent with the confidentiality previously approved by the Commission for CNE’s 2007 submission of this information. (See Attachment A, hereto.) As such, CNE continues to assert confidentiality through December 31, 2009 for the demand forecast information provided for 2006. Under CNE’s requested three year confidentiality window, CNE is requesting that the 2007 through 2011 data be protected through December 31, 2012.

CNE has also fashioned this request to reflect the scope of protection provided to energy service provider (“ESP”) data in CPUC Rulemaking 05-06-040, and, in particular, Decision (“D.”) 06-06-066, Appendix B (“ESP Matrix”) and related modifications made in 08-04-023.<sup>1</sup> The public release of the specified information, particularly to competitors and potential customers, would result in a loss of competitive advantage for CNE in the wholesale and retail markets, and may result in a loss in the ability to secure a favorable margin or return.

3. *Cite and discuss (i) the provisions of the Public Records Act or other law which allow the commission to keep the record confidential and (ii) the public interest in nondisclosure of the record.*

CNE is submitting the information and data sets described above in accordance with the Forms and Instructions adopted by the Commission in December 2008 (*Forms and Instructions for Electricity Demand Forecasts (including Retail Price Information) prepared in support of the 2009 Integrated Energy Policy Report, CEC-100-2008-011-CMF*).

Under Public Resources Code Section 25322, the Commission is required to grant a request for confidential designation of information collected pursuant to Pub. Res. Codes Section 25301(a) if:

- (a) the information is exempt from disclosure under the California Public Records Act (Govt. Code §§ 6250 et seq.);
- (b) the information meets the confidentiality requirements set forth in the Commission’s regulations; or
- (c) on the facts of the particular case, the public interest served by not disclosing the information outweighs the public interest served by disclosure.

The Public Records Act exempts “trade secrets” from public disclosure, including “any formula, plan, . . . production data, or compilation of information . . . , which is known only to certain individuals within a commercial concern who are using it to fabricate, produce, or compound an article of trade or a service . . . and which gives its user an opportunity to obtain a business advantage over competitors who do not know or use it.” (Govt. Code § 6254.7(d).)

---

<sup>1</sup> While CNE understands and acknowledges that the confidentiality rules granted by the California Public Utilities Commission and the California Energy Commission are different in some respects, CNE seeks to maintain consistency in the data it makes publically available. Consistency also prevents CNE from inadvertent disclosures of confidential information.

The Commission's regulations provide for information to be designated as confidential if it "contains a trade secret or its disclosure would otherwise cause a loss of a competitive advantage." (20 CCR § 2505(a)(1)(D).)

The information identified above, and any supporting data submitted by CNE, contain trade secrets or otherwise commercially sensitive data the disclosure of which would cause loss of a competitive advantage. As an entity operating in the competitive and dynamic retail energy markets, as well as a net purchaser in the competitive wholesale markets, CNE closely holds information on its retail and wholesale market positions in confidence. The materials identified above should be subject to a three-year confidentiality protection because the information is commercially sensitive and not publicly available and/or constitutes trade secrets the public disclosure of which would harm CNE. Moreover, this information can be used to determine, directly or indirectly, CNE's market position or business plans or procurement strategies, to the detriment of CNE and its customers. Accordingly, CNE requests that all of the information and data sets contained in those documents more specifically described in section 1 above, and any related, supporting data that may be provided pursuant to a subsequent Staff request, be designated as confidential.

CNE believes that the public interest in having an open, public debate on key energy issues facing the state can be satisfied by disclosure of information submitted by CNE and the other ESPs collectively aggregated on a state-wide basis. Any greater granularity in the data released, including disclosure of any CNE-specific data that is not aggregated with other ESPs, could expose CNE's market position to its competitors, including other ESPs and the investor-owned utilities ("IOUs"). In addition, CNE's information for a customer class should be aggregated with the information of one or more other classes where only a small number of customers in the class are served by ESPs.

CNE requests that the identified information also be deemed confidential for the following additional reasons: The information is commercially sensitive and constitutes a trade secret and is therefore exempt from disclosure. Evidence Code §1060, Civil Code §3426.1(d). Moreover, the public interest in nondisclosure clearly outweighs the public interest in disclosure insofar as release of this economic information may directly harm CNE's existing and future commercial opportunities and its ability to secure a return in the marketplace, and disclosure may also harm CNE's electric customers by foreclosing favorable commercial opportunities. Gov't Code § 6255.

4. *State whether the information may be disclosed if it is aggregated with other information or masked to conceal certain portions, and if so the degree of aggregation or masking required.*

CNE has considered whether it would be possible to aggregate or mask the identified information. CNE can support the aggregation of CNE-specific information with similar information from all other ESPs and solely disclosed on a *statewide aggregated basis*. CNE believes that disclosure of CNE-specific data of the types collected here, even if aggregated on a statewide basis but specific to CNE, could lead to the disclosure of CNE's wholesale and retail market positions and thereby result in harm to CNE. Given the degree of competition between ESPs, and between ESPs and the

IOUs, CNE asserts that any ESP-specific listing of data by utility territory would result in disclosure of confidential data.

5. *State whether and how the information is kept confidential by the applicant and whether it has ever been disclosed to a person other than an employee of the applicant, and if so under what circumstances.*

CNE has not disclosed any of the subject information to anyone other than their employees, attorneys and consultants working with the Company, or government agency employees or employees of the CAISO subject to confidentiality protection. CNE routinely keeps information of commercial value, like the subject information identified herein, confidential. In fact, all CNE "employees, officers and directors should maintain the confidentiality of information entrusted to them by the company or its customers, suppliers, business partners or others in the course of conducting business with the company, except when disclosure is authorized or legally mandated."<sup>2</sup>

*I certify under penalty of perjury that the information contained in this application for confidential designation is true, correct, and complete to the best of my knowledge. I also certify that I am authorized to make the application and certification on behalf of Constellation NewEnergy, Inc.*

**RE: Application for Confidentiality,  
Electricity Retail Demand Forecast Form 6  
Constellation NewEnergy, Inc.  
Docket No. 06-IEP-11**

Dear Mr. Brown:

On February 2, 2007, Constellation NewEnergy, Inc., (CNE) filed an application for confidentiality in the above-captioned Docket. The application seeks confidentiality for information contained on the Electricity Retail Demand Forecast form 6. Specifically, CNE seeks confidentiality for:

Data, disaggregated by utility distribution area, for annual metered sales, annual peak demand and customer counts, for years 2006-2009. . . . the information is market sensitive and constitutes trade secrets in terms of supply portfolio development and risk management, and (3) release of this information will result in loss of competitive advantage in the wholesale and retail marketplaces relative to CNE's ability to negotiate future contracts for the purchase or resale of energy and/or capacity at wholesale, or negotiation of contracts with retail customers, CNE asks that the identified data be held in confidence for at least a period of three (3) years from the time of production to the [Energy] Commission.

A properly filed application for confidentiality shall be granted under the California Code of Regulations, title 20, section 2505(a)(3)(A), "if the applicant makes a reasonable claim that the Public Records Act or other provision of law authorizes the [Energy] Commission to keep the record confidential."

CNE's February 2, 2007, confidentiality application makes a reasonable claim to grant confidentiality for the data identified above in its entirety. The information contained on form 6 constitutes a trade secret, and would place CNE at a competitive disadvantage if disclosed.

Andrew B. Brown  
March 5, 2007  
Page 2

The Energy Commission will aggregate the information submitted by CNE as follows:

1. For individual ESPs, data aggregated at the statewide level by major customer sector.
2. For the sum of all ESPs, data aggregated at the service area, planning area, or statewide levels by major customer sector.

The identified confidential information contained on form 6 will be kept confidential until December 31, 2009.

Persons may petition to inspect or copy the records that I have designated as confidential. The procedures and criteria for filing, reviewing, and acting upon such petitions are set forth in the California Code of Regulations, title 20, section 2506. Be advised that an appeal of this decision must be filed within fourteen days from the date of this decision. The procedures and criteria for appealing any part of this decision are set forth in the California Code of Regulations, title 20, section 2505. If you have any questions concerning this matter, please contact Fernando De Leon, Senior Staff Counsel, at (916) 654-4873.

Sincerely,  

B. B. BLEVINS  
Executive Director
