Project Title: Adoption of revisions to the Existing *Renewable Facilities Program Guidebook*

Project Location: 1516 9th Street, Sacramento, Sacramento County, California 95814

Description of Nature, Purpose, and Beneficiaries of Project: The Energy Commission revised the *Existing Renewable Facilities Program Guidebook* pursuant to Public Resources Code section 25747, which authorizes the Energy Commission to adopt substantive changes to the *Guidebook* upon providing ten days written notice. Assembly Bill 3048 (Committee on Utilities and Commerce, Chapter 558, Statutes of 2008) amended Section 25742 of the Public Resources Code to remove restrictions on biomass fuels that could be used by facilities receiving production incentive payments from the ERFP. Accordingly, the *Guidebook* changes would remove restrictions on biomass fuels per AB 3048. These changes would also reduce reporting requirements for biomass facilities participating in the Existing Renewable Facilities Program. Other changes would clarify the incentive structure offered to facilities receiving "all-in" pricing, clarify the provisions for distributing incentive payments to facilities receiving time-of-use payments, and would make other conforming changes including removing references to the Competition Transition Charge and to the New Renewable Resources Account, which no longer exist.
