PROJECT TITLE: CPV Vaca Station Project

<input checked="" type="checkbox"/> Telephone	888-391-6585	<input type="checkbox"/> Meeting Location:
NAME: Rod Jones, Laiping Ng, Ajoy Guha		DATE: 2/23/09
TIME: 1:02pm		
WITH: Andy Welch, CPV, Doug Davy, CH2MHILL, Dave Larson, Navigant, Inc.		
SUBJECT: System Impact Study for CPV Vaca Station Project		

COMMENTS:

At the request of Laiping Ng and Mark Hesters, I arranged a teleconference call with Andy Welch, Doug Davy, Dave Larson to discuss concerns regarding the CPV Vaca Station project System Impact Study (SIS). Laiping and Ajoy participated in the call with me. They had reviewed the SIS and needed clarification on some of the tables:

- a) Table 11-1 Mitigation of Category "A" and "B" Overloads, page 20
- b) Table 4-2 Modeling of Queued Projects in Project SIS
- c) Table 7-2 Governor Power Flow Studies – Summary of Results Based on Application of Short-Term Emergency Ratings, page 15
- d) Table 403 Generation Modeled in Project Area, page 6, and
- e) Wind Generation Level Sensitive Studies.

Staff also asked the applicant to provide a supplemental to the SIS. Dave Larson stated that he would follow-up with staff in a few days with an e-mail confirming what staff had requested and what CPV would be able to do. Staff agreed that we would wait to receive Dave's confirmation e-mail to make sure that we all are on the same page in terms of what sections of the study would be revised.
