PROJECT TITLE: BEACON SOLAR ENERGY PROJECT

<input checked="" type="checkbox"/> Telephone	(619) 696-4055	<input type="checkbox"/> Meeting Location:			
NAME:	Curtis Keebler Sempra Generation	DATE:	2-25-09	TIME:	4:44 p.m.
WITH:	Eric K. Solorio, Project Manager, Energy Commission				
SUBJECT:	Ownership of transmission lines and operating costs for photovoltaic power plants				

COMMENTS:

Mr. Keebler called me to inquire about ownership of the transmission lines that Beacon Solar Energy Project would connect to. I advised Mr. Keebler that according to 08-AFC-2 and the Systems Impact Study it appears that Los Angeles Department of Water & Power owns the transmission lines.

I took the opportunity to inquire with Mr. Keebler about his experience with operating costs for photovoltaic electric generating facilities. Mr. Keebler described the El Dorado Energy Solar facility (a 10MW project) that Sempra Energy is developing south of Las Vegas which will only require a single operator (1 person).
