# Electricity Storage and CPUC

IEPR Workshop

April 2, 2009

Kevin Dudney  
CPUC, Energy Division

# My Goals for Today

- To listen:
  - What changes can help (or hinder) storage?
    - CPUC processes or policies
- To describe:
  - How does IOU/CPUC procurement work?
  - Other CPUC storage efforts
  - What questions does CPUC have?

# IOU/CPUC Procurement

- Biennial, 10-year plans
  - Compliance with EAP “loading order”
- Competitive procurement via RFO, usually
  - Periodic RFOs for new (fossil) gen
  - Annual RFOs for RPS
- Approval by application or advice letter

## Other CPUC programs

- DR – permanent load shifting pilot
- SGIP – DG storage
- Smart Grid OIR
  - R.08-12-009

# CPUC Questions

- In what 'box' does storage fit?
  - RPS, DR, DG, conventional, T&D . . .
- What is the capacity value?
  - Does this change with location?
- How to compare alternatives?

# Thanks!

Kevin Dudney
