DATE	<u>APR 06 2009</u>
RECD.	<u>APR 06 2009</u>

Docket Office Staff:

Please docket this transmittal email from the Western Area Power Administration (WAPA or Western), Sierra Nevada Region (SNR).

This transmittal includes several supply forms S-1 and S-2 prepared on behalf of four small publicly owned utilities (POUs). These POU's are "full requirements customers" of Western, and all four have an annual peak load of less than 50 MW. They are:

- 1) Trinity Public Utility District
- 2) Lassen Municipal Utility District
- 3) Shelter Cove Resort Improvement District
- 4) Pittsburg, City of also known as Pittsburg Power Co., and doing business as Island Energy serving retail customers on Mare Island in the city of Vallejo.

On March 12, 2009, Western provided S-3 supply forms for each of these POU's reporting their 2008 hourly loads, as requested by the Energy Commission.

The POU's had the obligation to report to the Energy Commission this year as part of the 2009 IEPR, and we greatly appreciate the work of federal agency staff at Western to help the POU's complete these filings.
