DOCKET**06-AFC-7C**DATE APR 16 2009RECD. APR 17 2009

**NOTICE OF RECEIPT
PETITION TO MODIFY
HUMBOLDT BAY GENERATING STATION PROJECT
(06-AFC-7C)**

On January 22, 2009, the California Energy Commission received a petition from Pacific Gas and Electric Company (PG&E) to modify the Humboldt Bay Generating Station Project. The 163-megawatt project was certified on September 24, 2008. Construction was initiated on January 27, 2009 and the project is 16 percent complete. The facility is located approximately three miles south of the city of Eureka, in an unincorporated part of Humboldt County.

DESCRIPTION OF PROPOSED MODIFICATIONS

PG&E is seeking approval to temporarily use two additional laydown areas during project construction, comprised of approximately 30 acres of primarily vacant land at the existing Fields Landing industrial area. The land, formerly used as a wood products storage area and as a laydown area for previous construction projects, now contains two abandoned structures.

ENERGY COMMISSION STAFF REVIEW AND DETERMINATION

Pursuant to section 1769(a)(2), Title 20, California Code of Regulations, Energy Commission approval of the project modification is not required if Energy Commission staff determines that:

- There is no possibility that the modification may have a significant effect on the environment, and
- The modification will not result in a change to or deletion of a condition of certification, or make changes that would cause the project not to comply with applicable laws, ordinances, regulations, or standards (LORS).

Energy Commission staff determined that the proposed modification meets the criteria for staff approval because:

- The modification will not have any significant effect on the environment;
- Existing conditions of certification are sufficient to cover the proposed modification without changes to, or deletions of, any conditions of certification; and
- The project as modified will maintain full compliance with applicable LORS.

Any person may file a written objection to staff's determination within 14 days of the date of this notice on the grounds that the project modification does not meet the criteria set forth in Section 1769(a)(2). All objections must be in writing and must be sent either by U.S. mail, e-mail, or other document delivery service to Chris Davis, Compliance Project Manager, at the address shown next page:

California Energy Commission
1516 9th Street, MS 2000
Sacramento, CA 95814

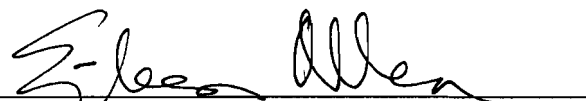

Comments may be submitted by fax to (916) 654-3882, or by e-mail at CMDavis@energy.state.ca.us. If no substantive objection is received in writing by 5:00 p.m. on May 4, 2009, the requested project modifications will be deemed approved, and a description of the change will be placed in the project file.

For further information on how to participate in any proceeding, please contact the Energy Commission Public Adviser's Office, at (916) 654-4489, or toll free in California at (800) 822-6228, or by e-mail at publicadviser@energy.state.ca.us.

If you have questions about this notice, please contact Chris Davis at (916) 654-4842, or by fax or e-mail using the above information.
