Application for Certification for the San
Gabriel Generating Station

DOCKET NO. 07-AFC-2

**SAN GABRIEL GENERATING
STATION REQUEST FOR
PROJECT SUSPENSION**

Pursuant to section 1716.5 of the California Energy Commission Siting Regulations, applicant RRI Energy¹, hereby submits this motion requesting a six (6) month suspension of the San Gabriel Generation Station (SGGS) 07-AFC-2. RRI Energy has been developing the SGGS to supply electricity within Southern California. The SGGS is located adjacent to the existing Etiwanda Generating Station within the South Air Quality Management District (SCAQMD).

As the Commission is aware, emission reduction credits are scarce within the South Coast air basin. The SGGS was planning to utilize the SCAQMD Priority Reserve Bank to satisfy its offset obligations. Since the rule authorizing use of Priority Reserve Credits has been withdrawn as a result of litigation, SGGS's permitting effort has essentially been at a standstill. At this time, there are some legislative and legal efforts underway that may allow the use of Priority Reserve emission reduction credits, however there is currently no means to predict if or to what extent these efforts will be successful.

RRI Energy continues to believe that southern California needs the generation the SGGS would provide and that development of the SGGS on the proposed site remains feasible. RRI Energy requests the Commission suspend the project

¹ On May 2, 2009 Reliant Energy, Inc changed its name to RRI Energy, Inc. The action was solely a name change and the ownership and operation of all subsidiaries remains unchanged.

for a period of six (6) months. If the emission reduction credits issue described above reaches a successful resolution, RRI Energy may elect to file to reinstate the AFC proceeding from suspension.

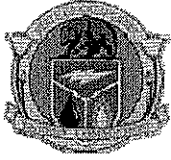

Should RRI Energy elect not to proceed after the six month period, it will either withdraw the AFC or provide an update warranting further suspension.

Dated: June 2, 2009

Respectfully submitted,
