

# Caltrans' Role in Climate Change and Sustainability

**DOCKET**

**09-IEP-1N**

DATE AUG 11 2009

RECD SEP 08 2009

Joan Sollenberger  
Chief, Division of Transportation Planning  
California Department of Transportation  
Integrated Energy Policy Report Workshop  
August 11, 2009

# Caltrans' Climate Action Program

## Complementary Strategies:

- Mitigation
- Adaptation

# Caltrans' Climate Action Program

## Mitigation:

Concerned with the impact of transportation on climate and mitigation measures

# Caltrans' Climate Action Program

## Adaptation:

Concerned with the vulnerability of transportation facilities and adaptation measures due to climate change

San Francisco and Oakland Airports – One meter sea level rise scenario

Landslide - Humboldt County, CA, State Highway 96

# Resource Conservation and Greening

5%-10% potential reduction in GHG emissions through greening and energy efficiency

- Cement Standard/Concrete Mix
- Highway Lighting
- Green Building
- Landscaping

# General Plan Participation

- Caltrans District staff
- Ahead of implementing individual transportation projects
- Balancing concerns

# Tools and Funding

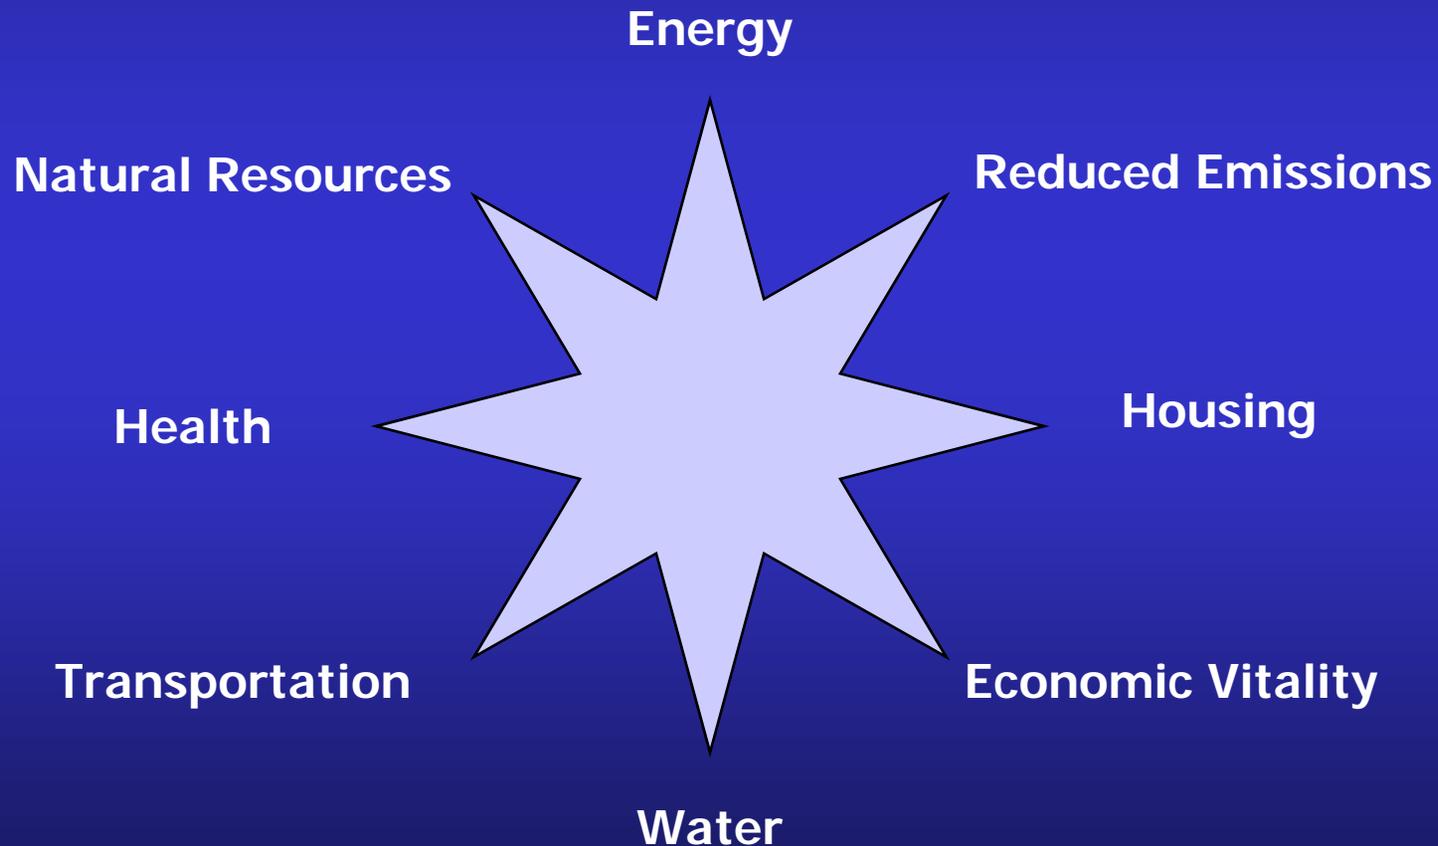

- Modeling Improvements
- Smart Mobility Framework
- Grants
  - Regional Blueprints
  - Environmental Justice
  - Community-Based Transportation
  - Partnership Planning
  - Transit Planning

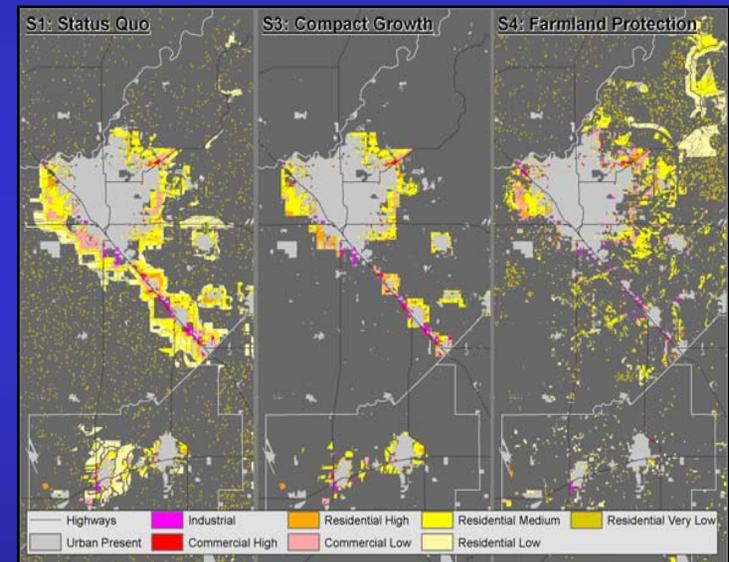

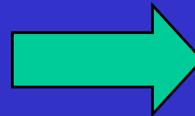

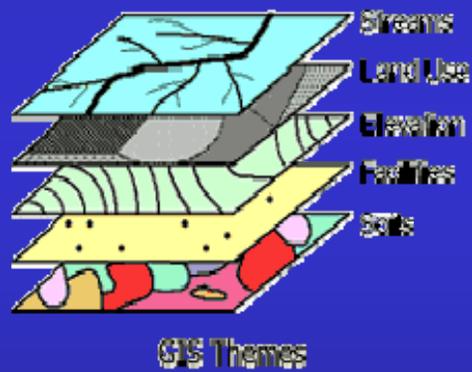

# SB 375, Transportation, and Regional Blueprints

- Regional GHG emission reduction targets
- Regional Transportation Plans
  - SCS part of RTP
  - APS not in RTP
  - RTP Guidelines being amended
- Regional Blueprints
  - More comprehensive than SB 375
  - Foundation for SB 375 compliance
  - Possible SCS

# Regional Blueprints: Community Issues Converge

# Scenario Planning

# Quality Decision-Making

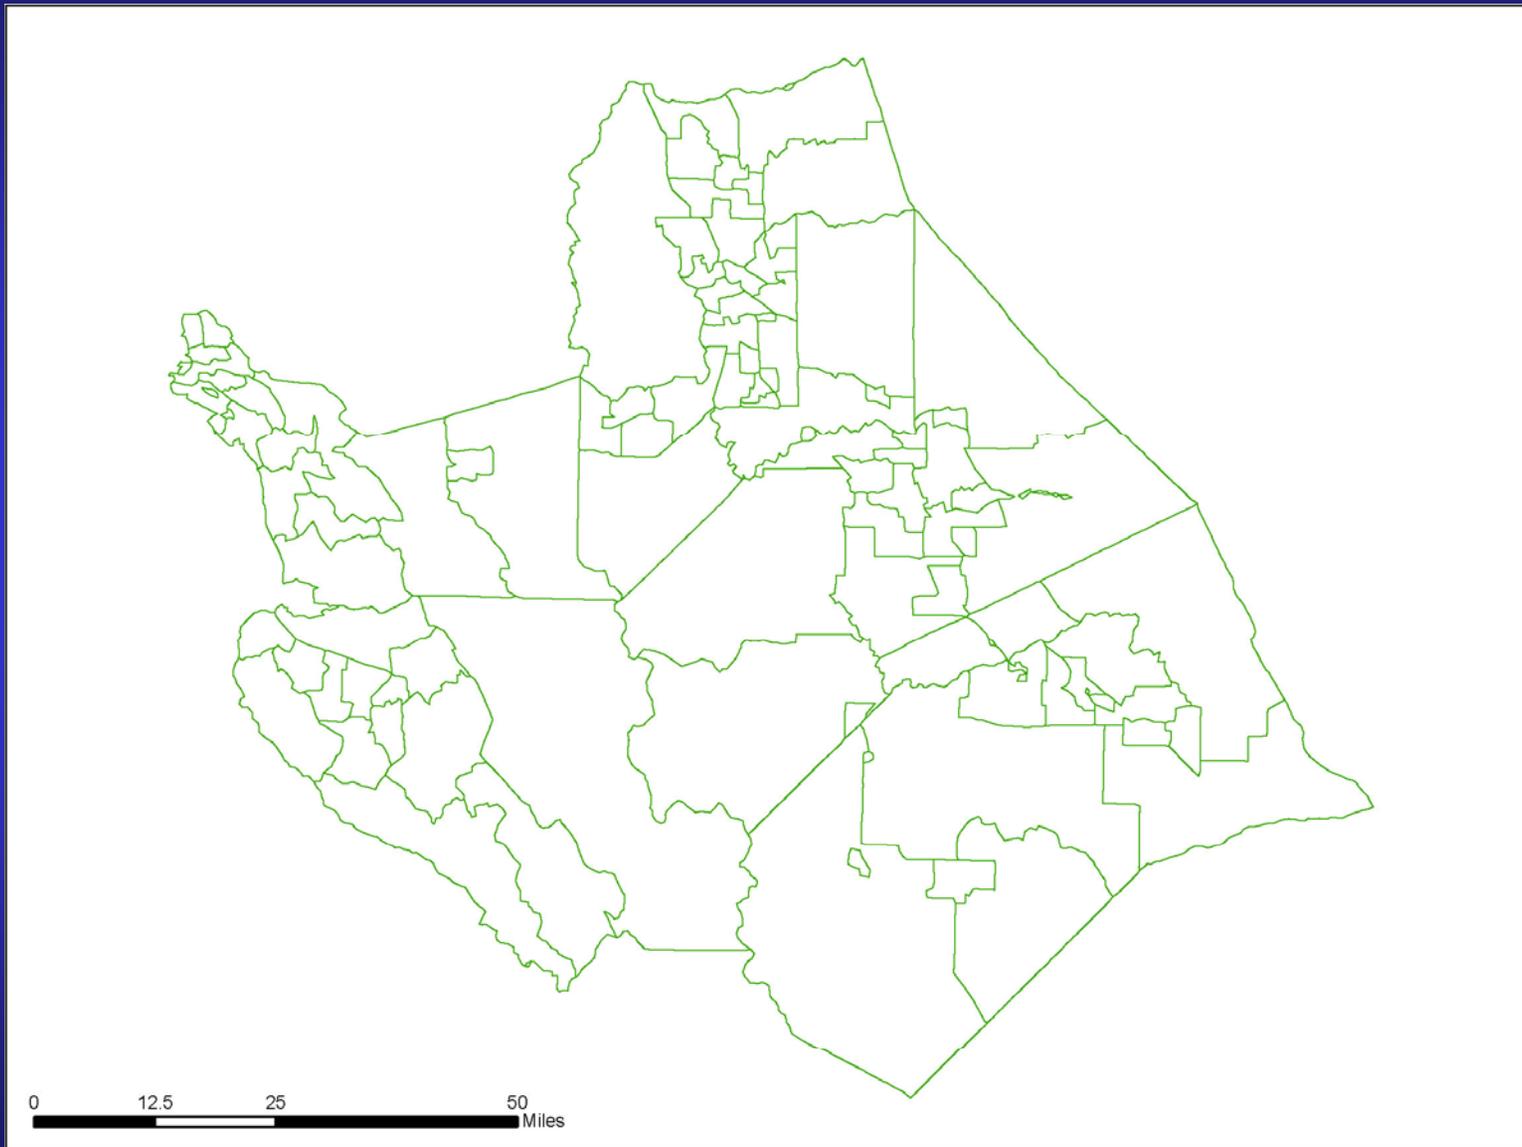

- Premise: knowledge improves decision-making
  - Assess alternatives before investing
  - Understand the impacts of our choices
- Today's decisions affect California's future
