Subject: Re: Gateway Generating Station Compliance Proceeding -- 00-AFC-1C

Martin,

I can't provide a substantive response since the Gateway facility is subject to a complaint which is being addressed by the Energy Commission's Siting Committee and the Commission's legal staff. Kevin W. Bell, one of the Commission's attorneys, is representing the comprehensive staff in the proceeding.

I'll be referring your questions to Mr. Bell. I'll also ask the Compliance staff to docket your e-mail and my reply tomorrow morning. If you have further questions, please contact Mr. Bell at kwbell@energy.state.ca.us or by phone at (916) 654-3855.

Eileen Allen, Manager
Siting & Compliance Office
California Energy Commission
1516 9th St., M.S.15
Sacramento, CA 95814
(916) 654-4082

I was wondering why the Gateway power plant is operating without an air quality permit? How could the Energy Commission allow a power plant to be built without first acquiring one of the most important permits, and now that it is known, why isn't the Energy Commission ordering it stopped?
