As part of the October 7, 2009, Business Meeting, the Energy Commission will consider adopting the revised *Energy Efficiency and Conservation Block Grant Program Guidelines* (Guidelines). These *Guidelines* were developed and were adopted on September 16, 2009 to help implement and administer projects funded by the Energy Efficiency and Conservation Block Grant (EECBG) Program under the American Recovery and Reinvestment Act (ARRA) of 2009.

Based on the necessary program modifications, the adopted *Guidelines* were revised as directed by the ARRA Ad Hoc Committee and published for public review as program *Guidelines* on September 22, 2009. The ARRA Ad Hoc Committee recommends the revised version of the *Guidelines* be adopted by the Energy Commission.

### Background

ARRA was enacted by Congress to preserve and create jobs and promote economic recovery, to assist those most impacted by the recession, to provide investments needed to increase economic efficiency by spurring technological advances, and to make investments that will have long-term economic benefits. ARRA gives preference to projects that promote and enhance these objectives in an expeditious manner.

The U.S. Department of Energy has allocated the Energy Commission \$49.6 million in ARRA funding for the EECBG Program. State law authorizes the Energy Commission to use these EECBG funds for energy efficiency, energy conservation, renewable energy, and other energy-related projects and activities authorized by ARRA. At least 60 percent of EECBG funds (\$29.8 million) are designated for activities in small cities with populations less than 35,000 and counties with populations less than 200,000.

The *Guidelines* describe the eligibility and procedural requirements for applying for EECBG funds.

The revised version of the *Guidelines* is available online at:  
[ <http://www.energy.ca.gov/recovery/blockgrant.html> ].

Hard copies of the Committee Draft version of the *Guidelines* may be obtained by contacting:
