Subject: Docket No. 09-AAER-1C

To the California Energy Commission -

DOCKET

09-AAER-1C

DATE NOV 01 2009

RECD. NOV 02 2009

I applaud you for your proposal to impose energy efficiency standards on TVs. This is an excellent idea that continues California's proud tradition of being first in the nation in energy efficiency.

Given that over 1000 TVs already meet these standards and manufacturers like Vizio have indicated their support of the proposed standards, the protests from the CEA and other "citizen" groups are merely rearguard actions to protect manufacturers who refuse to innovate.

As a Californian who is extremely concerned about our energy security and energy consumption costs, your proposed standards will help me keep my electricity costs down in the future and help reduce consumption growth. That makes me an enthusiastic supporter of your efforts here, and I encourage you to continue your good work!
