DATE	NOV 05 2009
RECD.	NOV 05 2009

Dear California Energy Commission:

I want my energy efficient TV! Energy efficiency is a no-brainer for California and we support your efforts to continue California's tradition of being the most energy efficient state in the country.

We urge you to adopt the proposed HDTV efficiency standards at your upcoming November 18 meeting. These efficiency standards will save consumers \$1 billion a year while preventing more than 3 million tons per year of global warming pollution.

Thank you for your leadership on this issue.

**Subject:** Please adopt HDTV efficiency standards

Dear California Energy Commission:

I am writing to encourage you to adopt the proposed HDTV efficiency standards. I don't know how much pressure you feel from industry reps, but I want you to know that many Californians--including real, TV-watching consumers--want energy efficient options. We don't have to follow industry's lead on this, and in fact it could be disastrous if we do. Please help shape the future direction of TV production by insisting on energy efficiency.

Many thanks.

Dear California Energy Commission:

I want my energy efficient TV! Energy efficiency is a no-brainer for California and we support your efforts to continue California's tradition of being the most energy efficient state in the country.

We urge you to adopt the proposed HDTV efficiency standards at your upcoming November 18 meeting. These efficiency standards will save consumers \$1 billion a year while preventing more than 3 million tons per year of global warming pollution.

Thank you for your leadership on this issue.
