Subject: Wastewater Treatment Permit/Recycled Water Use

I spoke with Mr. Kehla regarding whether the treatment and use of recycled water from a permitted wastewater treatment plant (WWTP) for industrial processes requires the user to obtain a permit from the RWQCB. Mr. Kehla stated that the industrial user does not require a permit from the RWQCB for the treatment and use of recycled water. The WWTP would be responsible for notifying the RWQCB of any changes that may affect their permit (e.g., WDRs).
