DOCKET No. 08-AFC-8

COMMITTEE SCHEDULING ORDER

On August 26, 2009, the Energy Commission determined that the Application for Certification (AFC) of the Hydrogen Energy California Power Plant Project was data-adequate for review under the process established by Public Resources Code, section 25540.6. The Energy Commission assigned a Committee of two Commissioners to conduct proceedings on the AFC. The Committee held a public Informational Hearing in the community of Tupman on September 16, 2009, to discuss the review process and to identify issues that could affect the attached schedule.

The Committee held a status conference with the parties on March 26, 2010. At the status conference, the parties and other interested agencies informed the Committee about the status of the case, and the parties submitted proposed schedules for the remainder of the AFC proceeding. We have adopted the attached Committee Schedule based on the parties' submissions and discussion at the Informational Hearing.

Given the complexities involved in resolving some of these issues, the parties are on notice that we may modify the schedule at any time upon either our own motion or that of a party. [Cal. Code Regs., tit. 20, § 1709(c).]

The schedule requires several status reports to inform the Committee whether or not case development is progressing satisfactorily, and to bring potential schedule delays or other relevant matters to our attention. We expect all parties (Staff, Applicant, Intervenors) to issue status reports in accord with this schedule.

Dated: April 22, 2010, at Sacramento, California.
