)
_____)

APPLICANT’S STATUS REPORT NO. 4

Pursuant to the Committee Scheduling Order dated December 14, 2009, Applicant BP Watson (“Watson”) files its Status Report No. 4 for the proposed Watson Cogeneration Steam and Electric Reliability Project.

The South Coast Air Quality Management District requested that the Project use aqueous ammonia in place of anhydrous ammonia. The air permit application was modified to reflect this Project change. A copy of the modified application was docketed with the CEC on March 2.

An Off-Site Consequence Analysis was prepared for the use and storage of aqueous ammonia. This analysis was docketed on March 4. The Off-Site Consequence Analysis was revised to address comments from CEC Staff. The revised analysis was docketed April 12.

Discussions with CEC staff continued in an effort to refine the proposed condition of certification regarding water use. As a result, the *Supplement to Responses to Questions from the January 20, 2010 Issues Resolution Workshop* was docketed April 2.

The Preliminary Determination of Compliance from the Air District is pending and is expected to be issued soon.

May 3, 2010

Respectfully submitted,

ELLISON, SCHNEIDER & HARRIS L.L.P.
