Subject

Ivanpah Solar Electric Generation System Project

Please accept this email as my comments. Our top priority needs to be the preservation of wildlife habitat. We have already destroyed FAR too much. Therefore, any solar project needs to be located where it won't impact wildlife, such as on top of buildings and above roadways and parking lots. Thus, NO solar project should or needs to be located in the desert, which is habitat for the endangered desert tortoise and many other species of concern.

Thank you,

Mike Vandeman, Ph.D.

--

I am working on creating wildlife habitat that is off-limits to humans ("pure habitat"). Want to help? (I spent the previous 8 years fighting auto dependence and road construction.)

Please don't put a cell phone next to any part of your body that you are fond of!
