To Whom It May Concern,

ABC Cooling & Heating Services, Inc., a GreenHomes America partner is very supportive of the proposal by the Ad Hoc Committee to add furnaces and air-conditioners to the California State Energy Efficient Appliance Rebate Program.

ABC Cooling & Heating has residential contracting locations in the Central Valley and the greater Bay Area. We've seen a downturn in retrofits including high-efficiency equipment replacements over the past two years due to the difficult economic situation and tight credit markets that homeowners are facing. This changes proposed are consistent with the ARRA funding and will help encourage much needed upgrades.

We encourage the Commission to adopt these changes as soon as possible.

Sincerely,

Jerry Unruh
President
ABC Cooling & Heating
