subject = Ivanpah Solar Power Project

FeedbackType = Comment

request_comment = I am appalled by your decision to fast track this

destructive project. Despite my own belief in the need to wean ourselves from non-green energy, the benefits of this project do not outweigh its damage to endangered species and the Mohave desert as a whole. Why is

pristine land being considered first for this project? There are many areas of degraded agricultural lands, dead lakebeds and vacant lots that are much more appropriate for solar projects. You are not acting as responsible stewards for the land or for the people of the US by going forward with this project, especially now that your own EIS reveals that you cannot mitigate for the destruction of rare plants or the loss of desert tortoises. I am ashamed that this project is being touted as green, when nothing could be further from the case.
